TRAVEL, A LIFE STYLE THAT EVERYONE LONGS FOR

Each manufacturing, each innovation and each ride are an unforgettable journey. In order to provide you with a perfect experience, Yutong spares no effort to achieve excellence in three fields, namely safety, comfort and ergonomics.

As the world's major bus and coach supplier and a leading bus maker in the industry whose market covers six continents with its sales volume of large and medium-sized buses ranked first in the world, Yutong has the capability and also the obligation to achieve that.

Moreover, Yutong has developed hybrid and full electric buses, which have already been widely put into operation. By

virtue of mature and stable technologies, conditions and advantages, Yutong buses have conducted demonstration run in the mainstream market in Europe.

TOURISM COACHESBEST TRANSPORT PARTNER FOR TRAVELING

Surveys showed that 40% of the travel time is spent on road, so the transport tools determine half of your mood.

Taking a train? Multiple transferring is complicated and inconvenient.

Taking an airplane? The transfer flight, waiting time, tedious security check and frequent delays are not uncommon.

If you choose a tourism coach, the point-to-point riding way features an effortless and cost-effective journey.

YUTONG COACHES BEST TOURISM COACHES

We think deeply about how to make the vehicle look attractive and reliable. The bus features elegant styling and good-looking headlamps.

Streamlined style featuring elegant and stylish appearance not only takes the aesthetics into consideration, but also reduces the air resistance and energy consumption.

Brand new design of headlamps: headlamps with innovative design are stylish and eye-catching.

DETAILS DESIGN PHYSICAL AND MENTAL ENJOYMENT

From the height of the luggage rack to rapidly getting fresh air inside the vehicle, from the ergonomic reading lights to the mute technology, we spare no effort to pursue the optimal ride comfort for passengers. You will feel fully relaxed, physically and mentally, during the whole journey.

Pressure-balanced seats

Adopt ergonomic design and fully fit the body characteristics, thus greatly enhancing the ride comfort.

High-performance video and audio system

The surround sound and anti-electromagnetic interference function enable passengers to feel like in a mobile concert hall.

Air conditioner with fresh air technology

It can keep the set temperature, enhance the ride comfort, purify the air inside the vehicle and other functions.

SMART TECHNOLOGY MAKES IMPOSSIBLE POSSIBLE

Self-driving sets your hands free

Intelligent vehicles and intelligent transport are the trend of future development. During the self-driving process, the road conditions and changes can be automatically detected and then the driving behavior will be corrected accordingly so as to ultimately achieve zero traffic congestion and zero accidents. Meanwhile, it can also minimize energy consumption, reduce costs and protect the environment.

As the first Chinese bus maker who was involved in the self-driving field, Yutong is carrying out the first-phase technical

research, such as route-followed driving, automatic obstacle avoiding, automatic steering, speed adapting, traffic light recognition, road marking recognition, traffic sign recognition, bus stops, terminal parking, etc.

In the future, the target of Yutong self-driving technology research is to gradually transform and apply the major technologies involved in unmanned automobiles, and ultimately realize the productization of unmanned buses.

Telematics technology manages the fleet comprehensively

Telematics is an innovative technology of “buses + internet”, which is used by Yutong to conduct comprehensive management of vehicles.

Monitoring management of vehicles: real-time supervision of the location and status of vehicles;

Safety management: ensure the safe operating in terms of vehicles and drivers' behaviors through pre-warning of vehicle status and statistics of drivers' behaviors;

Economical management: improve the economic indicators through multiple means like increasing the vehicle utilization rate, reducing fuel consumption, prolonging service life of spare parts and so on;

Operating management: enhance the operating and management efficiency through intelligent fleet management system;

Entertainment: multiple on-board entertainment devices can meet the needs of passengers.

40 units Yutong coaches delivered to Dunhuang for operation

A grand ceremony was held at the headquarters of Yutong on April 14, in Zhengzhou to mark the delivery of 40 units Yutong tourism coaches to their customer, Gansu Dunhuang Travel Automotive Co., Ltd. According to the bus operator, this batch of new vehicles will be put on some popular travel routes from Dunhuang to Lanzhou, Urumqi, Xi'an, etc. Specifically, the 40 units vehicles consist of two units ZK6609D51, four units ZK6126HQ, six units ZK6119H5Y and 28 units ZK6906H5Y.

All equipped with a "2+1" seat layout specially designed for business reception vehicles, passengers will enjoy much more spacious room. Moreover, a host of travel amenities such as

DVD players, Karaoke systems and on-board Wi-Fi will offer passengers with a variety of leisure activities.

Dunhuang Travel Automotive Co., Ltd. was officially set up in 2000. Currently, the company boasts 200 units vehicles, including 120 units large- and medium-sized tourism coaches and 80 units vans. As one of the largest bus operators in Gansu, it has always attached the paramount significance to passenger safety and travel comforts. For this reason, the bus operator firmly holds the belief that only the best quality vehicles can cater to its various demands.

"We have been cooperating with Yutong for seven years and

Yutong buses have helped us deliver unparalleled travel services to our customers", says Ye Guangjun, President of Dunhuang Travel Automotive Co., Ltd. Currently, 40% of the company's bus fleet are made by Yutong. The newly purchased 40 units Yutong travel coaches will be put into service mainly for building the premium travel routes along the silk road.

Yutong enters children safety seat market

In recent years, experts have been calling for the legislation of mounting children safety seats on vehicles.

As the leading bus brand in China, Yutong has been closely eyeing the emerging market. Recently, it officially announced its entry into the children safety seat market.

As early as 2005, Yutong started developing school buses. It succeeded in rolling out China's first generation school buses, ensuring the safety and healthy growth of many school kids in China. Under the government guidance, it also participated in launching the official safety standards for school buses in China, doing a great service for promoting the fast and sound development of Chinese school bus industry. Currently, the bus maker is able to roll out over 10,000 units school buses each year.

In October, 2015, Yutong set up Zhengzhou BIUCO Children

Products Co., Ltd. On the back of its competitive strengths in bus manufacturing industry, it is fully committed to producing the internationally competitive safety seats for children.

According to some insiders, Yutong safety seats for children are expected to make their debut at 2017 Beijing International Exhibition on Buses, Trucks and Components which is scheduled to be held in the coming May.

Yutong Shenzhen IT R&D Center officially starts operation

Recently, Yutong Shenzhen IT R&D Center officially starts operation, marking a huge step forward for the bus maker in the manufacturing intelligent and connected vehicles (ICVs).

To support the sustainable development of Yutong and maintain its competitiveness in the global bus manufacturing industry, Yutong Shenzhen IT R&D Center will focus on developing new technologies revolving around cloud computing, big data, and internet of vehicles.

With a favorable geographic location and an open and inclusive corporate culture, the center will inject new dynamics to the fast growth of Yutong's business.

Yutong wins 500-units order from Myanmar

Recently, Yutong officially signed a sales agreement with Yangon Public Transport Co., Ltd. for supplying the bus operator 500 units large-sized city buses. The batch of new buses are scheduled to arrive in Yangon in June this year.

Yutong entered Myanmar in 2010. Since then, the bus maker has significantly strengthened its presence in the country, ranking the first place among all bus brands. Currently, over 1,000 units Yutong buses are working smoothly in a number of cities across the country. Apart from exporting assembled vehicles to the country, Yutong has also set up assembly lines in Myanmar, providing technical support and a whole package of after-sales services to the local customers, ensuring the smooth operation of its vehicles.

Since 2004, Yutong has exported a total number of 35,000 units large- and medium-sized buses to over 40 countries along the Belt & Road, greatly enhancing Chinese brand image.

YES, I DO.

The 12th Yutong Mass Wedding Ceremony was held in Yutong Industrial Park, Zhengzhou on April 27, 2017. Totally 23 couples walked down the aisle on the grand ceremony. It is learned this event has been held for 12 times and totally 319 youth people tied the knots through the group wedding ceremony.
